

Doctor D. Nguyen

Wednesday, June 08, 2011

Subjects: Doctors

I am 79 scaring the heck out of 80.

Thru these many years I have been too many doctors for one reason or another.

In these past few years, I have finally found some really caring doctors. Doctors, Mullis (eye) doctor. He treats his patients just as he is seen many times on TV.

Doctor, D. Nguyen (Internal) . He is a soft speaking doctor, and makes his patients feel relieved when they go to him. He takes away their worry about having to see a doctor. If he recommends another doctor for a certain Problem, he does this for the best for his patient and he recommends Doctors Like doctor Dunn (Urological) This doctor also takes time to talk with his patients and makes them feel at ease. Doctor Dunn also works with other doctors of course, but one he sent me too that he works with also has to be one of the greatest ever.

I am writing about ,

Doctor H.Murshed (Cancer Treatment). I had never heard of Dr. Dunn or Dr. Murshed before, reason being I did not hear of anyone using their service until I openly let some friends know I was seeing them.

I am now hearing from some friends that had them for a doctor a while back, but a couple are using them now. For what ever reason they did not let me know? I guess they just did now want to talk about it.

One thing is for sure I not only talk open about the cancer treatments, I brag about my doctors. I also brag, yes brag about their nurses.

Like I said, in all my years, so far I have had a few doctors and have been for one reason or another, put in a hospital. But never have been treated like a human. It seemed like a number.

During my cancer treatments, Dr. Murshed called me every week end and ask how I am doing. If he even seen me in a hall some place he ask how I am doing? I told him today, "THANKS FOR SAVING MY LIFE".

Again it is the team work of Dr. Nguyen, Dr. Dunn and Dr. Murshed.

I praise these Doctors for getting great Nurses and Technicians

Staff to work for them. It takes a lot of skill as to do what they do.

I have never written about a doctor, but I am now, and I feel it is worth good reason. There are times I liked to be thanked for what I do.

I do not think the doctors are thanked enough. Serious.
